Dev Ganugapenta

West Palm Beach, FL · Remote (US)

Senior Software Engineer · Full-Stack & AI Applications

dganuga@gmail.com linkedin.com/in/dev-ganuga-4b3b6431a github.com/DevGanuga initdev.co/talent/dev-ganuga

Senior full-stack engineer who builds production platforms from a blank repo and takes them to market. Founding engineer on four startups in the last year — two generating revenue, one live pre-launch, one taken to investor demo — and lead engineer on Limpid&Co's production software in Amsterdam, including a platform presented at Web Summit 2025. TypeScript, Next.js, PostgreSQL, production LLM systems, Stripe billing.

SKILLS

Languages: TypeScript, JavaScript, SQL, Python

AI / LLM: OpenAI and Anthropic APIs (GPT-4o, Claude), structured output and tool calling, streaming, RAG with Pinecone embeddings, agent workflows (LangGraph, n8n), generative image and video (fal.ai, Tavus), transcription and media pipelines, human-in-the-loop review systems

Frontend: React 19, Next.js App Router (server components and server actions), Tailwind CSS, Framer Motion, TipTap rich-text editing, React Hook Form, Zod validation, Zustand, data visualization

Backend & Data: Node.js, PostgreSQL (schema design, migrations, row-level security), Supabase, REST and GraphQL API design, Shopify headless commerce, Clerk and Supabase Auth (OAuth), signed webhooks, cron jobs, transactional email (Resend), Google Maps Platform

Payments: Stripe subscriptions and customer portal, tiered and usage-based pricing, atomic credit ledgers with escrowed spend and automatic refunds, idempotent webhook processing

DevOps & Observability: Vercel (edge, serverless, cron), CI/CD pipelines, Sentry across edge and server runtimes, Playwright end-to-end testing

Architecture & Practices: Multi-tenant SaaS, event-driven and idempotent systems, production incident response, release QA, technical proposals and scoping

EXPERIENCE

Independent Product Engineer · Self-employed · Upwork Top Rated Plus

2025 – Present

The startups and the Limpid&Co platforms below were shipped through this practice.

- Built four startups from zero to a live product as founding engineer. Two are generating revenue.
- Built Limpid&Co's production software in Amsterdam: AI Navigator, Company Challenges, and the Phase 2 program won after Web Summit 2025.
- Top Rated Plus on Upwork, 100% Job Success, every completed engagement rated 5.0.

Lead Engineer · Limpid&Co

Oct 2025 – Jun 2026

Amsterdam · Three production platforms for one enterprise client. AI Navigator, Company Challenges, and the Phase 2 program after Web Summit 2025.

- Lead engineer on Limpid&Co's production software in Amsterdam. Three pieces of shipped work: AI Navigator, Company Challenges, and the Phase 2 production program.
- AI Navigator (navigator.leadingwith.ai): built the full production platform, including a GPT-4o assistant that opens screens and runs analyses, a 25-zone sentiment engine on 1,000+ employee survey responses, and an 8-dimension capability maturity model with automated gap detection. Live. Presented at Web Summit 2025.
- Wrote the Phase 2 production proposal after Phase 1 — scope, team, budget — and won the follow-on contract.
- Company Challenges (companychallenges.com): built the full production platform. Content is authored once and reused across cohorts. TipTap authoring, Stripe billing, Resend email, Vercel cron.
- Owned production support. Traced an aggregate-query outage to a PostgREST regression after a Supabase upgrade and shipped the fix the same day.

Founding Engineer · Dyia May 2026 – Jun 2026

Field-service SaaS. Built from zero. Live in production with paying subscribers. dyia.io

- Founding engineer. Built Dyia from a blank repo to a live SaaS with paying subscribers in two months.
- Production surface: dispatch, invoicing, job profitability, Anthropic reporting on live job and profit data — roughly 70 API routes.
- Stripe subscriptions with signed webhook verification and idempotent plan grants.
- Sentry across edge and server runtimes. Used it to find and fix a live billing incident.
- Wrote the release QA checklist that has gated every release since.

Founding Engineer · Animalia Apr 2026 – Jun 2026

Pet wellness e-commerce. Built from zero. Live storefront, pre-launch. animalia.market

- Only engineer. Built the production storefront from zero to live on Next.js 16, Tailwind 4, and TypeScript.
- Typed domain layer over Shopify Storefront, Cart, and Admin APIs, 33 GraphQL operations.
- Merchandising engine is plain ranking code weighted by revenue. No model call at request time, so ranking is unit-testable and fast.
- AI photography pipeline reads the catalog, generates brand-constrained images with fal.ai, and writes them back through the Admin API.

Platform Engineer · Strengthening the Saints Feb 2026 – Jun 2026

Church discipleship platform. Production multi-tenant Postgres. Team build.

- Production platform engineer on a team build: 84 routes, 82 migrations, row-level security isolating each congregation.
- Built the TipTap authoring experience for sermons and studies, including scripture verse insertion and text normalization.
- Shipped through CI: lint, typecheck, build, and Playwright smoke tests on every push.

Founding Engineer · AI Blueprint Jan 2026 – Mar 2026

AI creative platform. Built from zero. In production and generating revenue.

- Founding engineer from first commit to production revenue.
- Atomic SQL credit ledger with a non-negative constraint under concurrent spend.
- Credits are reserved when a generation starts and refunded if the model fails.
- Idempotent Stripe webhooks and duplicate-subscription guards. Replayed events cannot double-charge or double-grant.
- Stack: Next.js 15, Supabase, fal.ai, Clerk.

Founding Engineer · Drip Oct 2025 – Dec 2025

San Diego, CA · AI relationship companion. Built from zero, solo, to investor-demo stage.

- Only engineer. Built the full product in three months and took it to investor-demo stage: 98 API routes, 38 migrations.
- Dual-store memory: Postgres for structured data, Pinecone for semantic recall, rollback across both stores when one write fails.
- Ownership-scoped embedding queries. Privacy does not depend on prompt instructions.
- Operator console: draft, approve, send. No AI-drafted message reaches a user without a human.

AI Automation Lead · Yorali USA 2023 – 2024

Boynton Beach, FL · Full-time.

- Cut customer acquisition cost 45% and manual process load 60% with custom AI sales tooling.
- Trained a team of 8 to 95% adoption; 30% lift in sales productivity.

Business Development Manager · 4D Global (Inc. 5000) 2023

Miami, FL · Full-time. Healthcare revenue operations.

- Improved appointment conversion 35% and qualified leads 25% through outbound automation.
