# Dev Ganugapenta

West Palm Beach, FL · Remote (US)

**Senior Software Engineer · Full-Stack & AI Applications**

dganuga@gmail.com linkedin.com/in/dev-ganuga-4b3b6431a github.com/DevGanuga initdev.co/talent/dev-ganuga

Senior full-stack engineer who builds production platforms from a blank repo and takes them to market. Founding engineer on four startups in the last year — two generating revenue, one live pre-launch, one taken to investor demo — and lead engineer on Limpid&Co's production software in Amsterdam, including a platform presented at Web Summit 2025. TypeScript, Next.js, PostgreSQL, production LLM systems, Stripe billing.

## SKILLS

**Languages:** TypeScript, JavaScript, SQL, Python

**AI / LLM:** OpenAI and Anthropic APIs (GPT-4o, Claude), structured output and tool calling, streaming, RAG with Pinecone embeddings, agent workflows (LangGraph, n8n), generative image and video (fal.ai, Tavus), transcription and media pipelines, human-in-the-loop review systems

**Frontend:** React 19, Next.js App Router (server components and server actions), Tailwind CSS, Framer Motion, TipTap rich-text editing, React Hook Form, Zod validation, Zustand, data visualization

**Backend & Data:** Node.js, PostgreSQL (schema design, migrations, row-level security), Supabase, REST and GraphQL API design, Shopify headless commerce, Clerk and Supabase Auth (OAuth), signed webhooks, cron jobs, transactional email (Resend), Google Maps Platform

**Payments:** Stripe subscriptions and customer portal, tiered and usage-based pricing, atomic credit ledgers with escrowed spend and automatic refunds, idempotent webhook processing

**DevOps & Observability:** Vercel (edge, serverless, cron), CI/CD pipelines, Sentry across edge and server runtimes, Playwright end-to-end testing

**Architecture & Practices:** Multi-tenant SaaS, event-driven and idempotent systems, production incident response, release QA, technical proposals and scoping

## EXPERIENCE

### Independent Product Engineer · Self-employed · Upwork Top Rated Plus

2025 – Present

The startups and the Limpid&Co platforms below were shipped through this practice.

- Built four startups from zero to a live product as founding engineer. Two are generating revenue.
- Built Limpid&Co's production software in Amsterdam (AI Navigator, Company Challenges, and the Phase 2 program that followed Web Summit 2025). Top Rated Plus on Upwork, 100% Job Success, every completed engagement rated 5.0.

### Lead Engineer · Limpid&Co

Oct 2025 – Jun 2026

Amsterdam · Three production platforms for one enterprise client. AI Navigator, Company Challenges, and the Phase 2 program after Web Summit 2025.

- Built AI Navigator as a live production platform (navigator.leadingwith.ai): GPT-4o assistant that navigates the product and runs analyses, a 25-zone sentiment engine on 1,000+ employee responses, and an 8-dimension capability maturity model. Delivered in time for Web Summit 2025, then wrote and won the Phase 2 production contract (scope, team, budget).
- Built Company Challenges as a live production platform (companychallenges.com): author a challenge once, run it across any number of cohorts, TipTap authoring, Stripe billing, lifecycle email. Traced a production outage to a PostgREST regression after a Supabase upgrade and shipped the fix the same day.

### Founding Engineer · Dyia

May 2026 – Jun 2026

Field-service SaaS. Built from zero. Live in production with paying subscribers. dyia.io

- Built the entire production product in two months: crew dispatch on Google Maps, invoicing, job profitability, an Anthropic reporting assistant on live job data, and tiered Stripe subscriptions with signed, idempotent webhooks. Roughly 70 API routes.
- Launched to paying subscribers. Diagnosed and fixed the first live billing incident in production, then wrote the release QA checklist that has gated every release since.

**Founding Engineer · Animalia** Apr 2026 – Jun 2026

Pet wellness e-commerce. Built from zero. Live storefront, pre-launch. animalia.market

- Only engineer. Built the production storefront from a raw supplier catalog: typed domain layer over Shopify Storefront, Cart, and Admin APIs (33 GraphQL operations), on Next.js 16 and TypeScript.
- Wrote the merchandising engine as deterministic, revenue-weighted ranking — no LLM in the page render path — and an AI photography pipeline that generates brand-constrained images with fal.ai and writes them back through the Admin API.

**Platform Engineer · Strengthening the Saints** Feb 2026 – Jun 2026

Church discipleship platform. Production multi-tenant Postgres. Team build.

- Shipped production features on a live multi-tenant platform: 84 routes, 82 migrations, 200+ row-level security policies so each congregation's data stays its own.
- Built sermon and study authoring on TipTap with scripture insertion. Every push runs lint, typecheck, build, and Playwright smoke tests.

**Founding Engineer · AI Blueprint** Jan 2026 – Mar 2026

AI creative platform. Built from zero. In production and generating revenue.

- Built the full production platform: multi-studio generation on fal.ai, Clerk auth, Stripe subscriptions, and a paid credit economy on Next.js 15 and Supabase. Live and generating revenue.
- Designed the billing core the product depends on: atomic SQL credit ledger that cannot go negative under concurrent spend, credits reserved during generation and refunded when a model fails, Stripe webhooks that cannot double-charge on replay.

**Founding Engineer · Drip** Oct 2025 – Dec 2025

San Diego, CA · AI relationship companion. Built from zero, solo, to investor-demo stage.

- Only engineer. Built the full production product in three months: 98 API routes, 38 migrations, dual-store memory (Postgres + Pinecone), and an operator console where a human approves every AI-drafted message before it sends.
- Privacy is enforced in the retrieval queries, not the prompt: two partners share one companion and cannot read each other's memories.

**AI Automation Lead · Yorali USA** 2023 – 2024

Boynton Beach, FL · Full-time.

- Cut customer acquisition cost 45% and manual process load 60% with custom AI sales tooling.
- Trained a team of 8 to 95% adoption; 30% lift in sales productivity.

**Business Development Manager · 4D Global (Inc. 5000)** 2023

Miami, FL · Full-time. Healthcare revenue operations.

- Improved appointment conversion 35% and qualified leads 25% through outbound automation.

## EDUCATION

**McFatter Technical College** — Technical Degree, Computer Science & Network Support 2024

## CERTIFICATIONS

**Harvard Business School** — CORe (Credential of Readiness): Analytics, Strategy & Management 2025

**Stanford University School of Engineering** — Strategic Planning Professional 2024

**IBM** — Python for Data Science, AI & Development Specialist 2024
