INITDEV PORTFOLIO SERIES

The AI Blueprint

Multi-app AI creative suite for e-commerce creators - avatar identity preservation, credit-metered Gemini image generation, Stripe-hardened billing.

Dev Ganugapenta · Founder, InitDev

Ownership

Primary contributor on this branch (105 / 135 commits as Dev Ganuga) across prompt systems, generation API, Stripe/credits, and product surfaces. Co-authors present - not sole authorship of every file.

Strongest technical accomplishments

1. **Identity-preserving prompt engines** for UGC, nails, and photoshoot domains on Fal Gemini 3 Pro Image.
2. **Atomic credit ledger** with spend RPC, rollover caps, and one-time failure refunds.
3. **Stripe integrity layer** - duplicate-subscription guards, idempotent grants, payment-failure credit freeze/restore.
4. **Async generation pipeline** - Fal webhooks + status polling safety net + permanent storage.
5. **Four-studio platform** sharing one auth, credit economy, projects, and admin ops plane.

Architecture / stack

Next.js 15 / React 19 · TypeScript · Clerk · Supabase · Stripe · Fal Gemini 3 Pro · Zustand · Vercel (inferred)
