

Company Challenges

Production learning-trajectory platform - reusable content ops, dual collective/individual participation, admin control plane.

Dev Ganugapenta · Founder, InitDev

Brand: Company Challenges by Limpid&Co

Roles: Founding Eng · Senior Full-Stack · Product Eng · Tech Lead

Ownership

End-to-end delivery observed in git (single author name across commits): schema, Next.js app, public UX, analytics, Vercel release QA.

Strongest accomplishments

1. Assignment reuse via AssignmentUsage (content ≠ presentation).
2. Dual modes: anonymous collective + username individual progress after retiring Clerk.
3. Sprint scheduling, sequential unlocks, milestones, timezone-aware countdowns.
4. Deep challenge duplication including collective artefacts.
5. Production release discipline with stakeholder QA evidence packs.

Stack (verified use)

Next.js 16 · React 19 · TypeScript · Supabase
Postgres/Storage · Tailwind 4 · Server Actions · Vercel.
Admin auth is client-gated (**PARTIAL**); Clerk is
DEPRECATED .
