INTEGRATIONS

STRONGEST TECHNICAL WORK

- **Human-in-the-loop AI:** 21 typed tools, bounded loop, propose/confirm before any write.
- **Money integrity:** idempotent, signature-verified Stripe webhooks + livemode guard; tier derives from the billed price.
- **Merchant payments:** Stripe Connect pay links/invoices with platform fees + payouts.
- **Multi-tenant + RLS** with a single tested access computer; pgvector job similarity.

OWNERSHIP

Primary engineer across frontend, backend, data, payments, AI, and ops (229 commits). Owned a live billing incident end to end: detection → reconciliation tooling → root cause → fix → customer refunds.

VERIFIED

Lint pass (0 errors) · 53 tests pass · production build pass.

ARCHITECTURE AT A GLANCE
